11 Jun 2008-12 Jun 2008

**Venue**

Vincentz Network  
Internet  
Germany

**Categories**

Chemistry; Materials & Consumables; Technische Chemie, Oberflächentechnik

**Description**

Module Additives - The trouble-shooters

Additives are coming to the fore as the demands on quality rise and environmental legislation is tightened up. Additives avoid defects and impart specific properties to coating systems. They are also critical to the marketability of a coating material. This module deals with wetting and dispersing additives along with rheological and surface additives. On completion, you will be able to control the properties of your coating systems through the judicious choice of additives.

Topics covered:

- \* Effects achievable with additives
- \* Which surface additives exist and where they are used
- \* How to control the rheology of a coating system with additives
- \* The chemistry behind antifoams
- \* The applications properties of the various types of binder

Use this form to request further information about the event **WebSeminar Coatings: Additives II** directly from the organiser **Vincentz Network** .

### ***Message to the organiser***

I have read your event presentation **WebSeminar Coatings: Additives II** on the website **Bionity.COM** . I wish to receive further information.

- please send additional information (brochures, PDF documents etc.)
- please submit a quotation
- please contact me

### ***Contact Information***
